# Introduction

---

The Secretariat-General is pleased to introduce its Annual Statistical Report for the Year 2025, which presents information and statistical data relevant to the various sources of energy, to serve energy and petroleum industry researchers and experts.

For the sake of preparing this report, reliance was placed on the energy data collection form completed by the member countries' liaison officers and on data issued by national institutions and some secondary sources.

The report begins with a summary of some key economic indicators including population, Gross Domestic Product (GDP), crude exports value, goods and services exports value, and energy indicators in the member countries. The first section of the report deals with data related to proven oil and natural gas reserves, crude oil and natural gas liquids production developments, in addition to marketed natural gas production developments. The member countries' reserves of crude oil by the end of 2024 were estimated at approximately 718.2 billion barrels, representing about 53.9% of the global reserve of 1333 billion barrels.

Natural gas reserves in the member countries in 2024 amounted to about 55.05 trillion cubic meters, constituting 26.1% of the global reserves of 211.2 trillion cubic meters.

Regarding the production of crude oil and natural gas liquids, the production of member countries in 2024 reached about 24.9 million b/d, of which 21.5 million b/d is crude oil production. The member countries' production of crude oil constitutes approximately 24.6% of global production of 87.4 million b/d.

On the other hand, the production of marketed natural gas in member countries reached approximately 551.5 billion cubic meters in 2024, representing about 13.0% of global production.

The second section of the report touched upon oil and natural gas processing operations, as the design capacities of existing oil refineries in member countries rose in 2024 to reach 10327 thousand barrels per day. The member countries' production of petroleum products reached approximately 8511.4 thousand b/d.

The third section reviews indicators of consumption of energy sources, including the consumption of crude oil and petroleum products by product,

along with the consumption of natural gas and other energy sources. It is noteworthy that the total energy consumption in the member countries in 2024 amounted to approximately 13.43 million barrels of oil equivalent per day, of which 5.899 million barrels of oil equivalent per day were crude oil and petroleum products, in addition to approximately 7.40 million barrels of oil equivalent per day of natural gas.

The fourth section of the report deals with the available data on oil and natural gas trade in the member countries, including data on exports and imports of crude oil, petroleum products and natural gas. The fifth section of the report reviews the spot prices of oil crudes of the member countries and some international crudes, as well as the spot prices of OPEC's monthly and annual baskets of crudes, in addition to the prices of petroleum products in the member countries in local currency and US dollar. In its sixth section, the report addresses oil and natural gas transportation operations in terms of the number of tankers, their tonnage, and the pipeline network available in the member countries of the organization.

By launching this report, the Secretariat hopes to serve researchers and those interested in the field. At this point, we would like to avail ourselves of this opportunity to extend our sincere thanks to the officials in the member countries for their constant cooperation in providing the Secretariat with official information and data that have contributed to enriching and adding more transparency to the contents of this report.

**Thank you.**

**Secretary General  
Eng. Khaled Al Otaibi**

**Units**

**1 metric ton** = 2204.62 lb. = 1.1023 short tons

**1 kilolitre** = 6.2898 barrels = 1 cubic metre

**1 kilocalorie (kcal)** = 4.187 kJ = 3.968 Btu

**1 kilojoule (kJ)** = 0.239 kcal = 0.948 Btu

**1 (Btu)** = 0.252 kcal = 1.055 kJ

**1 kilowatt-hour (kWh)** = 860 kcal = 3600 kJ = 3412 Btu

**One tons of oil equivalent equals approximately:**

**Heat units** 10 million kilocalories = 42 gigajoules = 40 million Btu

**Solid fuels** 1.5 tons of hard coal = 3 tons of lignite

**Electricity** 12 megawatt.hours

Annual Statistical Report 2025

### Definitions and abbreviations

**OAPEC** : UAE - Bahrain - Tunisia - Algeria - S.Arabia - Syria - Iraq - Qatar -  
Kuwait - Libya - Egypt

**boe / d** : Barrel of Oil Equivalent / day

**b / d** : Barrel / day

**BTU** : British Thermal Unit

**NGL** : Natural Gas Liquid

**LNG** : Liquefied Natural Gas

**LPG** : Liquefied Petroleum Gas

#### General notes

Iraq's data excluding Kurdistan region with the exception of crude oil and Natural gas reserves and production data.

**ORGANIZATION OF ARAB  
PETROLEUM EXPORTING  
COUNTRIES**
